

## **Feedback we have received so far:**

### **Service User Forum hosted by Compass Disability on 21 May 2014**

The Forum indicated that they wanted an additional statement on “I am enabled to take risks”

They also felt that there should be a statement about the personal responsibility of the person, ensuring that they work positively to achieving the outcomes they want to achieve.

There was a strong view that the people should have access to the right information, resources and services to maintain their independence and to make the best use of that support to reduce any long term reliance on those services. “I can get information from xxxxx”
