

Local Account Foreword

Cabinet member for Adult Social Care
Councillor William Wallace

Our local account is an important part of our commitment to be transparent with local residents about what we do and spend.

This local account shows the Councils performance from 2013 to 2014, and how we can work with users and carers to improve their experience of social care and support.

This is our second local account and this year we hope to begin to reflect what local people want.

The pace of change is getting faster, bringing challenges and opportunities for us all. A big opportunity is working closely with health and the Clinical Commissioning Group, bringing greater integration with health to provide a better joined up service for people in Somerset.
